

品發鋼模實業股份有限公司

Taiwan Goods sent steel mold Industrial Co., Ltd.

Professional services: to undertake OEM foundry ODM design and manufacture of precision plastic injection electronic components group, the 3C product housing, motor mechanical parts, automobile spare parts, computer peripheral products, communication equipment, home appliances accessories, medical equipment, stationery , liquid container, Valet volume production \ painting \ printing \ electroplating .

Featured mold Material:

Main mold material: toughness, wear-resistant, high-yield, high-quality Swedish Vikings steel production and heat treatment.

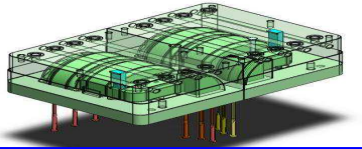

Mirror high chromium stainless steel. Corrosion-resistant high-quality steel production in Sweden STA heat treatment . Germany M461 and Tatung Co., Ltd., Japan NAK80 quality 40 degree steel production.

Machinery and equipment:

CNC milling machine / CNC discharge
Processing machine / Plastic Injection Molding Machines

Development process

The first stage(1.)	End product, 2D, 3D Figure ↓ The measured dimensional tolerances, plastic raw materials, sample exploration The	 Valuation, Develop mold
The second stage(2.)	tryout (sample test) ↓ Modify (finished confirmation)	
Third stage(3.)	Mass production → quality control ↓ Shipping
